

PDTS UI Creator

Custom controls for your touchscreen project

With an intuitive drag-and-drop interface and full System Builder integration, the UI Creator empowers commissioning engineers to easily build screens and menus with the required functions, controls, and branding for any project.

Customise any page with buttons, sliders, text, graphic elements, and more to provide users with a seamless experience of the Dynalite system.

PDTS UI Creator

Custom controls for your touchscreen project

- **Quick Start Wizard** – Import project data from System Builder to create a full-featured control UI with just a few mouse clicks.
- **Intuitive drag-and-drop interface** – Add and arrange controls, text elements, images, indicators, and more.
- **Simple configuration menus** – Customize the appearance and functionality of any page, element, or control with ease.
- **Access control** – PIN code logins protect the PDTS from unauthorised access when located in a public area.
- **Buttons** – Recall scenes, navigate between pages, and trigger advanced tasking functions within the PDTS. You can even place invisible buttons over a background floor plan for intuitive navigation to each room or area's control page.
- **Sliders** – Adjust light and tunable white levels for individual lighting groups.
- **Images and backgrounds** – Add full color branding and logos, decorative elements, or even helpful instructions for new users.
- **Status indicators** – Provide at-a-glance confirmation of active presets in any area.
- **Time and date** – Show the current time and/or date on any page with adjustable fonts, sizes, and colors.
- **Environmental indicators and controls** – Add temperature and humidity readouts, with optional HVAC controls to adjust the temperature setpoint.

Specifications
